s indicates a conversion type of string when using python s string formatting capabilities more specifically s converts a specified value to a string using the str function

the s tag is just an abbreviation of the qualifier descriptor sarcasm
by convention most people understand the whole expression without the
need to spell it all out just like a tl dr or a ps etc

nov 26 2010 39 these are all informative answers but none are quite getting at the core of what the difference is between s and d s tells the formatter to call the str function on the argument and

nov 16 2019 2 the s replaces one space match at a time but the S replaces the whole space sequence at once with the second parameter and because your second parameter is empty string
